

Outdoor Activity Sheet. Spring 2020.
Maths. KS1. Activity 2.

Find a starting point and jump as far as you can. Use a shoe or another object to mark how far you jumped.

Can you estimate the distance?

Now measure and see how far you jumped. (Don't forget to include your units.)

Were you correct?

What was the difference between your estimate and your actual jump?

See how many friends or family jumps you can measure.
Record them in the table below:

Distance
 (cm)

Name

Who jumped the furthest?	Who did the smallest jump?
What is the difference between the biggest and smallest jump?
